### MARKET REVIEW

Sugar sales during September continued at a high level - more than one million tons, according to preliminary reports. This was the third consecutive month this year in which deliveries exceeded one million tons and the second consecutive year in which they have exceeded this amount in each of July, August and September. Through October 11 distribution by primary distributors for continental consumption was reported as 8,337,000 short tons, raw value, compared with 8,430,000 tons during the same period last year. Cane sugar refiner's deliveries of 5,713,000 tons were about 310,000 tons below the same period last year, but were 84,000 tons above the comparable period in 1967. Beet processors' deliveries of 2,472,000 tons were 262,000 tons and 230,000 tons more, respectively, than during the same periods 1968 and 1967.

Physical deliveries of sugar (including constructive deliveries made during the previous year) through October 11, 1969, total 8,554,000 tons or 113,000 tons more than during the same period in 1968. Physical deliveries by beet processors through October 11, 1969 were 472,000 tons higher than during the same period in 1968

Preliminary reports of stocks of raw and refined sugar of all primary distributors as of September 27 totaled 1,436,000 short tons, raw value, down 262,000 tons from a month earlier and up 187,000 tons from the end of September last year. Cane refiners' stocks of 779,000 tons were 93,000 tons less than at the end of August but 18,000 tons above the end of September last year. Beet processors' stocks of 526,000 tons were down 143,000 tons from a month earlier but up 175,000 tons from the end of September last year.

Prospects for sugarbeet production in 1969 improved during September according to the Department's Crop Reporting Board. Based on October 1 conditions production is now forecast at a record 28 million tons, one percent more than the September 1 forecast and ten percent above last year's production. The U. S. average yield is indicated as 17.6 tons of sugarbeets per acre compared with 18.0 tons last year and 17.1 tons in 1967.

September weather generally favored sugarbeet development and prospects improved, or held, in all states except Michigan where a period of dry weather that started in July continued through September considerably reducing yield prospects. During the first part of October cold and snowy weather in Colorado, Nebraska, Wyoming and Montana impeded sugarbeet harvesting operations.

Sugarbeet harvest is active in all areas of California and good yields are reported from the coastal areas. Digging began in most states in September and should become general in all sugarbeet areas by mid-October.

The October forecast for production of sugarcane for sugar and seed on the mainland and in Hawaii is now 22.8 million tons down from 23.1 million tons forecast in September and eight percent below the 1968 crop production. Prospects for the mainland cane crop declined two percent during September because of unusually dry weather in Louisiana. The forecast remains unchanged from a month earlier for Florida and Hawaii. Harvest is scheduled to begin in Louisiana about mid-October.

Cane sugar production in Hawaii through October 4 this year totaled 977,000 tons, 96° basis, compared with 1,079,000 tons through October 5 last year. Production figures this year still reflect the effects of a 30 day strike in February and March which closed practically all of the sugar plantations in the state. The harvesting period is expected to be extended until late in the calendar year so that most of the lag in production, as compared with last year, is expected to be made up by year end.

Regionally, there has been little deviation in 1969 as compared to 1968 in reported refined sugar deliveries. Through August, national deliveries were 1.9 percent smaller this year than in the corresponding months last year. Since March of this year three of the regions--the mid-Atlantic, the North Central and the West -- have received slightly less and two of the regions--the Northeast and the South--have received slightly more sugar than during these months of 1968. Individually, 21 states received more sugar in the first eight months of 1969, as compared with last year, and 29 received less.

The spot quotation for raw sugar duty paid and delivered to New York, averaged 7.73 cents per pound during the first nine months of 1969, or about three percent above the average for the same period last year. In January the price averaged 7.67 cents per pound and increased in each succeeding month reaching 7.82 cents in May after which it declined in June and July. July's average price of 7.50 cents per pound was the lowest monthly average price for the year to date and the lowest since May 1968 when it averaged 7.48 cents per pound. In August the spot quotation averaged 7.75 cents and in September was 7.83 cents per pound compared with 7.62 cents in September of last year.

On September 30 a cane sugar refiner announced that to meet competition in New York, Fairfield County, Connecticut and New Jersey (north of a line through Trenton and Atlantic City and excluding those cities) they would consider orders for industrial sugars at current contract prices (11.50 cents per pound) until close of business October 3 for shipment through November 14, 1969. Other interested sellers followed with announcements of a similar import. No other announcements affecting the price of refined sugar sold in the basis-pack--100 pound paper bags--were noted during the period under review.

Shown below are the price quotations, as of October 17, for refined sugar sold at wholesale in the basis pack by regions. Significant variations from the quoted prices may be found in certain areas reflecting competitive conditions peculiar to these areas.

	<u>Cane</u>	<u>Beet</u>
	<u>Cents per pound in 100 lb. paper bags</u>	
Northeast	11.70	
Southeast	11.00	
Gulf	10.65	
Eastern beet		10.35
Chicago-west	10.35	10.35
Lower Pacific	10.25	10.25
Northwest intermountain	10.25	10.25

The U. S. average retail price for refined sugar sold in 5-pound paper bags was 12.52 cents per pound during August, up from 12.50 cents in July and 12.22 cents in August of last year. For the first eight months of 1969 the retail price has averaged 12.35 cents per pound or 1.5 percent higher than the January-August 1968 average price.

The spot price for World sugar, bagged and stowed at Greater Caribbean ports, including Brazil, as quoted by the Spot Committee of the New York Coffee and Sugar Exchange averaged 3.10 cents per pound in September, down from 3.18 cents in August and up from 1.45 cents in September of last year. On October 1 the quotation was 3.15 cents per pound, declined to 3.10 cents on October 2 and to 3.00 cents on October 3 where it remained through October 9. On October 10 the price increased to 3.10 cents where it remained through Oct. 17. On October 17 futures contracts for January 1970 delivery of World sugar were quoted at 3.39 cents per pound compared with 3.49 cents per pound for January 1971 delivery.

ADMINISTRATIVE ACTIONSDate announcedNature of action

October 3,  
1969

Announced a determination of fair and reasonable prices for the 1969 crop of Louisiana sugarcane. The determination continues the sharing relationship and other provisions of the 1968-crop determination except for an increase in the maximum processing rate for sugarcane damaged by a general freeze.

The period for determining the season's average price for raw sugar and molasses is Oct. 10, 1969, through April 23, 1970. The period for determining the delivered average price of raw sugar is Oct. 10, 1969, through Dec. 31, 1969, for 1969-crop sugar, raw value, marketed in 1969 under the processors' marketing allotment, and Jan. 1, 1970, through Feb. 26, 1970, for 1969-crop sugar, raw value, not marketed in 1969. The basic price per ton of standard sugarcane is \$1.05 for each one-cent per pound of raw sugar determined on the basis of the weekly, season's or delivered average price, as elected by the processor in writing to the State Agricultural Stabilization and Conservation Service office not later than Oct. 17, 1969. (See October 9, 1969 Federal Register).

October 3,  
1969

Announced a national sugarbeet acreage requirement of 1,450,000 acres for the 1970 crop. This compares to plantings of 1,495,000 acres in 1968 and 1,660,000 acres in 1969. The 1970 acreage program is necessary in order to avoid production of more beet sugar than will be needed to meet the quota and carryover requirements.

<u>Date announced</u>	<u>Nature of action</u>
October 9, 1969	Provides means for determining the rates of commercially recoverable sugar from mainland cane sugarcane for the 1969 and subsequent crops. (See October 16, 1969 Federal Register).
October 10, 1969	<p>Announced revised allotments to domestic beet sugar processors, totaling 60,105,925 hundred-weight, refined sugar, equivalent to the quota of 3,215,667 short tons, raw value.</p> <p>The revised allotments are based on final data which only recently became available. Previous allotments were based in part on estimated data and were limited to 90 percent of the quota. (See October 17, 1969 Federal Register).</p>
October 13, 1969	<p>Announced a public hearing on fair prices for the 1969-70 Puerto Rican sugarcane crop.</p> <p>The hearing will be held November 13, 1969, in the Conference Room, Seventh Floor, Segarra Building, Stop 20, Santurce, Puerto Rico, beginning at 10:30 a.m.</p> <p>To obtain the best possible information, USDA requests that all interested persons appear at the hearing to present views and make recommendations on all matters related to fair prices for sugarcane. The notice specifically requests information concerning testing and evaluation of sugarcane particularly in regard to (1) the method to be used in determining dilution compensation factors at those mills where sugarcane is washed, and (2) the determination of the amount of trash and extraneous material delivered with producers' sugarcane. (See October 16, 1969 Federal Register).</p>

Date announcedNature of action

October 17,  
1969

Announced that a public hearing will be held Nov. 13 at Santurce, Puerto Rico, to develop a basis for allotting the direct-consumption portion of the 1970 mainland sugar quota for Puerto Rico.

This hearing will begin at 9:30 a.m. in the Conference Room, 7th Floor, Segarra Building, Stop 20, Santurce, Puerto Rico. (See October 22, 1969 Federal Register).

October 17,  
1969

Announced its determination of fair and reasonable prices for the 1969 crop of Florida sugarcane.

The determination continues the provisions of the 1968-crop determination without change, and is expected to continue the sharing relationship between the producer and processor as established in the 1968 determination. The basic price per ton of standard sugarcane is \$1.12 for each one-cent per pound of the season's average price of raw sugar. (See October 23, 1969 Federal Register).

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. September 1969 sugar deliveries for continental U.S. consumption 1,059,000 short tons, raw value (preliminary), up about 12,000 tons from August 1969 and up 46,000 tons from September 1968. January-September 1969 deliveries 8,021,000 short tons, raw value (preliminary), down 104,000 tons from January-September 1968. Final data for August 1969 deliveries 1,047,000 short tons, raw value - previously published preliminary as 1,052,000 tons.

2. Primary distributors' stocks September 27, 1969 were 1,436,000 short tons, raw value (preliminary), up 187,000 tons from a year ago, and down 262,000 tons from end August 1969. During September refiners' stocks decreased by 93,000 tons, beet processors' stocks by 143,000 tons, mainland cane processors' stocks by 29,000 tons and importers of direct consumption sugar stocks increased about 3,000 tons.

3. Charges to 1969 quotas through September 30, 1969 were 8,297,093 short tons, raw value, leaving a balance of 2,502,907 tons to be supplied within the 10,800,000 ton total.

4. Regionally, January-August deliveries, 1969 as compared with 1968 were up in two of the 5 regions: Increases - New England 1.0 percent, South 0.2 percent. Decreases -- North Central 3.7 percent, West 3.5 percent, mid-Atlantic 1.4 percent.

1/ Establishments that acquire no raw sugar from others for refining. Processor-refiners are included with refiners.

2/ Includes Mainland cane sugar not charged to quota: Raws, 265,869; Refined, 25,944; Total, 291,813.

3/ Production less deliveries of raw sugar to refiners.

4/ Includes 595,332 tons received from Mainland cane processors.

5/ Receipts of raw sugar by refiners less melt.

6/ Refiners' inventories include mainland cane sugar not charged to quota: Raws, -0-; Refined, 6,601; Total, 6,601. Importers' inventory include 1,625 tons for quota exempt purposes.

1/ Spot prices are for bulk sugar under Contract No. 10 which, beginning November 21, 1966, replaces Contract No. 7. The terms of these contracts are duty paid or duty free, full duty rate .625 cent per pound.

2/ Spot prices are those under No. 8 Contract which is for bagged sugar f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ The No. 10 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports 81 January 1959, pages 5 to 9.

5/ Revised.

1/ Gross basis price in 100-pound bags subject to a 2 percent cash discount.

2/ Hydrate, commercial bags less than carlots, ex whse., N.Y. 100 lbs. Beginning April 1964 price is for 600 bag carload f.o.b. N.Y.

3/ For regular conversion sirup (38-49 D.E.) per cwt. in tank cars f.o.b. New York, except February 1962 to April 1964 price is for drums in less than carlots. Quoted as 42° Baume unmixed, except beginning March 1956, quoted as 43° unmixed.

4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.

HAWAII

All but one of the plantations in the Hawaiian Islands are corporate entities. To facilitate the actual production of sugar, all plantations but one are represented by agents or a parent company in Honolulu. Several have mainland offices. Controlling interest in some plantations is held by an agency or parent company; other plantations are merely clients.

The agencies in Hawaii, plantations they represent and the Post Office address, indicating the island on which each is located, are as follows:

<u>Agency</u>	<u>Plantation name and address</u>	<u>Agency</u>	<u>Plantation name and address</u>
